Z	Undo last action	Redo last undo command
Tab	Cycle forward through stickies	Cycle backwards through stickies
-/[Reduce font size of selected text/image	
+/]	Enlarge font size of selected text/image	
?	Locate sender in the Friends list, also display the number of lines and characters in use	
1-0	Send sticky to that favourite friend	Send sticky to that favourite friend as a secret sticky
F4	Close sticky	

While placing text using the Text tool, scrolling the mouse wheel will change the size of the text. Holding control as you place text changes the font, and holding shift cycles through colours.

Additional shortcut keys

- Alt-F4 will exit Stickies
- F2 will edit the sticky title
- F3 will "find again" in text stickies
- Alt and a number on the top row sets the current sticky to that style. Pressing this key combination when some text is selected changes just that text. With no selection, the entire sticky is changed.
- Alt-c inserts a checkbox in text stickies
- Alt-f copies the selected text formatting
- Alt-v applies the saved text formatting to the currently selected text
- Alt-r toggles rolled-up mode
- Alt-s allows you to choose a skin for just one sticky. Shift-alt-s returns that one note to the default skin
- The context-menu key on those keyboards with one has the same effect as right-clicking a sticky title bar; it calls up the context menu for the sticky. Shift-context menu will open the context menu for the content of the sticky
- Pressing the left shift and control keys and releasing them sets the current paragraph as LTR for text stickies. If this keyboard combination interferes with other apps, you can disable this shortcut in Options/Advanced.
- Pressing the right shift and control keys and releasing them sets the current paragraph as RTL for text stickies. If this keyboard combination interferes with other apps, you can disable this shortcut in Options/Advanced.
- Double-tapping control brings up a menu of favourite friends
- Holding Alt and pressing the arrow keys moves a sticky around the screen
- Holding Control and Alt and pressing the left and right arrow keys resizes a sticky horizontally
- Holding Alt as you move a sticky turns on or off snapping, opposite to the default selected
- Holding Control as you start to drag a sticky creates an exact copy of the sticky
- Holding Control and rolling the mouse wheel changes the size of all the selected text or image up and down
- Holding Shift as you draw a line in an image sticky forces the line to be horizontal or vertical
- Holding Shift as you draw a rectangle in an image sticky forces the shape to a square
- Holding Shift as you draw a circle in an image sticky forces the ellipse to be a circle
- Holding Control as you draw a rectangle or circle fills in the shape
